Professional Experience

◆ Pharmacies Management System - Full-Stack Developer.

A web application that keeps tracking all pharmacies, their drugs, products' requests, and their sales' history for both pharmacy owner and admin 'Health government'. All this would make all its uses simpler and more beneficial for both, and it would also help other users to find pharmacies and products more easily.

◆ BIKA-merce - Full-Stack Developer.

A web application for furniture commerce that is specialized in selling home furniture, kitchen, living room, and related accessories.

Responsibilities for both projects:

- Analyzed project's requirements starting from the design phase to the build phase.
- Analyzed database relations, drew the schema, and created models as we have used sequelize.
- Built a RESTful standardized API and a well-designed back-end architecture.
- Created and built React components using typescript and designed with mui and CSS.

Education

- ❖ July 2022 - November 2022. **Code Academy Bootcamp** - GazaSkyGeeks, Gaza, Palestine.

- ◆ An intensive learning environment, nurturing the development and growth of professional skills running five days a week for four months. Code Academy provides a unique and comprehensive curriculum based on international best practices.

- ❖ September 2018 - Present. **Software Engineering** - Al-Azhar university - Gaza, Palestine with GPA : **90.1%**
